EXAMINER'S COMMENTS

Reason(s) for Withdrawal of Rejections

In the Remarks section of the Amendment filed 11/18/04, Applicant argues that in the Kalogeros reference, the upstream arm and the downstream arms are merely abutted against the disk retainer and the second stage disk, respectively and thus, O-seals 26 and 28 are used to prevent leakages. In contrast, the invention calls for the upstream arm and the downstream arms are coupled to the disk retainer and the second stage disk, respectively by interference fit. The arguments are found to be persuasive. Therefore, the rejections of claims 1, 2, 4-9, 11-13, 15, 16, and 18-20 based on the Kalogeros are hereby withdrawn.
